NioCoin NFT 1.0
License Agreement
Cryptic Alliance

Created: August 28, 2024

Grant of Rights, Limitations, and Warranties:

1. Each Edition of the Cryptic Alliance collection on the Chia blockchain. Ownership of the NFT is mediated entirely by the On-Chain Contract and the Chia Network.

2. The Copyright Owner of the Works remains the copyright owner. The Grantee is not receiving ownership of the Works but is receiving certain limited rights in the Works as set forth herein.

3. Upon confirming the NFT on the blockchain, Buyer becomes the Grantee and immediately receives a worldwide, non-exclusive, transferable license to the Works as set forth herein, for the period the Grantee owns the NFT.

4. Grantee is granted the right to use, copy and display the Works.

5. Grantee may not modify the works, create derivative works, transform the works or perform the Works.

6. Grantee MAY NOT make commercial use of the Works, except to resell or transfer some or all the rights granted herein.

7. Any exercise of right granted hereunder requires attribution to the Copyright Owner and the Creator if they are listed in the NFT sale, where reasonably possible.

8. Grantee shall not challenge Licensor's copyright ownership of the Works.

9. The NFT Seller warrants they are authorised to license the Works and consistent with these terms.

10. Grantee may contact the Grantor if Grantee wishes to obtain rights not otherwise included herein. Any further grant of rights shall be in writing and evidenced by a further NFT, or signed documents, agreed to by all parties.

11. In no event will Grantor be liable to Grantee for any loss of profits or consequential damages with respect to the subject matter of this License. In no event will Grantor be liable for any inability for Grantee to access the Artwork, including as a result of any downtime, failure, obsolescence, removal, termination or other disruption relating to the servers upon which the Artwork is stored or any other NFT platform or marketplace.

12. This License only addresses the rights to the Works attached to the NFT transaction, not the NFT itself. There may be additional terms on the NFT listing page. To the extent there is a direct conflict, the NFT sale/listing page shall control.
